Option 3: (72 words)

Certification completed in generative AI.

This training helped me develop the knowledge needed to use artificial intelligence tools ethically, responsibly and effectively.

Understanding what AI can do is important. Understanding its limits, risks and best practices for using it is just as important.

One more step in my professional development as I continue to grow in an environment where AI plays an increasingly important role.

Option 4: (90 words)

I'm pleased to have completed COFOMO's generative AI certification.

This learning journey allowed me to deepen my understanding of artificial intelligence technologies and strengthen my knowledge of their responsible, ethical and secure use.

Beyond the tools themselves, this certification raised my awareness of best practices related to privacy, risk management and thoughtful AI use in a professional context.

AI offers tremendous potential when used with discernment. I'm proud to contribute to its responsible adoption.

Option 5: (91 words)

Pleased to have earned the COFOMO AI Certification – Generative AI module.

Artificial intelligence is rapidly transforming the way we work. Understanding its possibilities, its limits and the best practices surrounding it has become an essential skill.

Through this certification, I strengthened my knowledge of generative AI, its responsible use, and the issues related to ethics, privacy and security.

Thank you to COFOMO for investing in the skills development of its teams and preparing us for the challenges of tomorrow.

Option 6: (107 words)

Pleased to have earned the COFOMO AI Certification – Generative AI module.

Artificial intelligence is already transforming the way we work. Developing a solid understanding of these technologies and learning how to use them responsibly has become an essential skill.

This certification helped me consolidate the foundations of generative AI, deepen my understanding of issues related to ethics, privacy and security, and better understand how to integrate these tools in a professional context.

I want to thank COFOMO for investing in the development of its teams and making continuous learning a driver of innovation.

The next step starts now.
