Production Value

THE EUROPEAN SCHEDULING & BUDGETING WORKSHOP

09 > 17/01/2026

NOORDWIJK/NETHERLANDS

ABOUT THE WORKSHOP

PRODUCTION VALUE is an established initiative within the European film industry. This 8-day workshop aims at strengthening the creative partnership between assistant directors and line producers/production managers with producers and directors. It focuses on seven European feature films and limited series in preproduction, endeavouring to meet the creative and financial challenges of each project.

7 assistant directors and line producers are coached by very experienced European line producers and 1st ADs.

Additional experts in visual effects, post-production and sustainable filmmaking are part of the process. During the last two days, the producers/directors will join the workshop to discuss the developed proposal for the budgets and schedules of their projects.

The training focuses on the skills required for planning and budgeting challenging and complex projects. It expands the knowledge and creative thinking of line producers and first assistant directors to strengthen their future role in the international film production process.

The workshops also promote intercultural dialogue between participants, tutors and projects by bringing together different nationalities in teams. This enables participants to learn from other film cultures and understand the different production conditions of European territories.
