

How to Manage Drivers

7 SAFETY-FORWARD WAYS TO EASILY MANAGE ALL YOUR HIRES

1. SAFETY MANAGEMENT

Tenstreet's comprehensive Safety Management solution gives you visibility into the full story of a driver.

It connects pre-hire with post-hire, pulls data from CSA and popular telematics companies, and leverages Pulse for easy document sharing, automated assigned corrective training, virtual coaching, communication, and more.

2. ENHANCED DRIVER QUALIFICATION FILE (DQF)

Unburden yourself from the mountainous stacks of paper and tangled Annual MVR process. The DQF Control Center reports missing/expired documents and makes complicated processes simple. Complete the Annual MVR process in record time to send digital COVs to your drivers, order MVRs in bulk, capture required CDLs through driver upload, create custom alerts for drivers and safety managers, and easily manage the progress of each of your drivers.

3. DRIVER MANAGEMENT

Stop losing track of your driver's accidents and incidents with this high-level, cumulative view of your drivers' history.

Create your own points system that uses automated workflow to send video trainings and quizzes to drivers to keep them on course with industry standards, regulations, and company policies.

4. BULK MVR

Ordering annual MVRs one at a time is now a thing of the past.

Simply select the subset of drivers you want to target using custom search criteria (like an anniversary month) and order all your MVRs in a matter of seconds.

5. TRAINING CONTENT LIBRARY

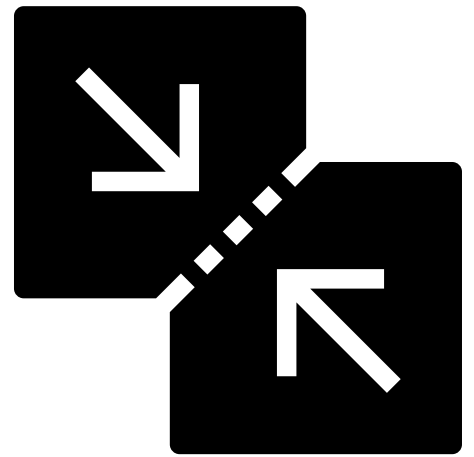

Give your drivers the training they need. Our training content library helps carriers build a comprehensive training and coaching program. This complete driver training library allows for peace of mind regarding driver safety.

With an interactive video training and testing library, carriers can assure that their drivers are up-to-date on the latest in safety, injury prevention, maintenance, wellness and personal care.

6. CSA INTEGRATION

Get on the road to improved safety and have transparency into how your drivers are performing.

Pull daily carrier and driver FMCSA CSA data into your Tenstreet dashboard and utilize infraction->action, a groundbreaking approach that automatically identifies and assigns corrective training to drivers based on the infraction received.

7. FMCSA CLEARINGHOUSE SERVICES

Keep your hiring processes on track. Designate Tenstreet as your TPA and reach drivers more quickly to minimize any negative effect on your time-to-hire.

The Driver Pulse network connects with drivers to improve turnaround time and time-to-hire. Carriers enjoy easy query order and delivery, automated annual bulk limited query ordering, adverse action support, driver education, and DQF alerts and reporting.

TENSTREET

We help companies succeed in a paperless environment, assist clients in recruiting and retaining drivers, and ease the lives of our clients and drivers alike.
