

How to Optimize Your Fleet for Maximum Efficiency

3 WAYS TO IMPROVE FLEET PERFORMANCE AND CUT DOWN ON INEFFICIENCIES

1. TRUE FUEL

Transform your fleet management with True Fuel® - the real-time in-cab coaching technology that pairs fuel efficiency data with a fully automated way to reshape the behavior of each driver.

True Fuel® reports a fair and accurate metric of driver fuel efficiency, helping carriers to see up to a 10% improvement in fuel economy. Say goodbye to wasted fuel and hello to a leaner, more efficient fleet.

2. TRUE LOAD TIME

With True Load Time™, you gain foresight into your truck's likelihood to sit at a customer location. This invaluable knowledge allows you to plan upcoming loads with precision, negotiate improved rates with underperforming customers, boost earnings, and ensure driver satisfaction.

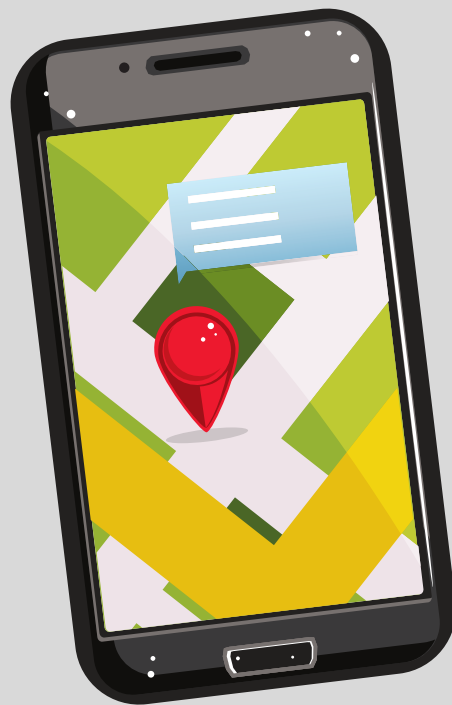

Don't let uncertainties slow you down. True Load Time™ is your key to proactive fleet management, maximizing efficiency, profitability, and driver contentment.

3. TRUCKMAP

Streamline navigation, enhance safety, and optimize your fleet's efficiency with TruckMap, providing turn-by-turn routing, real-time traffic updates, and crucial alerts for low clearances and weight restrictions to your drivers. Breathe easy knowing that drivers are navigating confidently with location-specific details such as truck entrances, access roads, and loading docks.

All this power is conveniently packed into the FREE Driver Pulse App, where drivers are already managing their careers.

TENSTREET

We help companies succeed in a paperless environment, assist clients in recruiting and retaining drivers, and ease the lives of our clients and drivers alike.
