# Reduce Supply Chain Risk to Enable Better Business

Your company's safety and sustainability standards were created to protect your brand and mitigate costly risk. Enforcing your standards across your supply chain is a difficult task that is spread across multiple departments which creates a disconnected view of supply chain risk.

Veriforce provides complete visibility into and control over your supply chain with the support of industry experts and leading technology that puts company, worker, and worksite data at your fingertips.

Leverage the only solution that spans your entire supplier lifecycle to streamline your existing supplier list and join the most powerful network of vetted supply chain partners to find new, qualified contractors and suppliers.

# Join the Most Powerful Supply Chain Risk Management Network

When you join Veriforce, you become part of an unrivaled network of hiring clients, contractor companies, individual workers, trainers, and evaluators. You'll have peace of mind knowing your existing contractor base is fully vetted and the workers on your site are highly qualified. When you need new contractors, qualified workers, or expert trainers and evaluators, the Veriforce network helps you fill any gaps.

*"Veriforce has been vital resource in the tracking and maintenance of our vendor compliance program. Their team of compliance professionals have worked with Endeavor to customize options that allow us to efficiently manage a large and diverse group of contractors. They continue to innovate their system in a way that allows us to perform sweeping projects and also zero in on specific compliance related issues for HSE and legal vendor requirements."*

Kara Viner - Vendor Compliance, Legal Team - Endeavor Energy Resources
