

# ESG Risk Management and Compliance

**With the changing regulatory environment and investors renewing their focus on sustainable businesses, there is increasing demand for organizations to develop and meet Environmental, Social, and Governance (ESG) mandates.**

From carbon capture to waste management, human rights, and executive compensation the scope is broad and becomes increasingly complex when trying to track and manage contractors and material suppliers. Veriforce's ESG capabilities allow clients to gather and track ESG information from their supply chain as part of their existing risk and compliance management process in our platform. By doing so, we handle the complexities of ESG tracking across your supply chain, so you do not have to.

## Develop an ESG Mandate

If you are just getting started, enabling Veriforce's ESG capabilities can be a great way to start tracking data for an initial view into the ESG of your supply chain.

## Tracking for Investment

Show investors that your organization is being built for long-term sustainability by incorporating ESG tracking and management into your routine operations.

## Hire for Alignment

Dive into your material supplier or contractor information and choose to work with those that adhere to your ESG requirements.

## Meet ESG Standards

Use the information captured in Veriforce when you apply for ESG ranking and conduct reporting for standardized frameworks.

When tracking and reporting on ESG, data collection is one of the top issues organizations face. Veriforce solves this for its customers by integrating our ESG capabilities with your existing risk and compliance process, to gather the information you need.

## Built to Meet Your Needs Now and in the Future

Our ESG capabilities span the entire ESG spectrum, allowing you to manage the risks most relevant to your business today and in the future.

### Environmental

- General environmental
- Water usage
- Energy usage
- Waste management & recycling
- GHG emissions & carbon footprint

### Social
