

The new Palitx by Elm utilizes the CRX-25iA/L robot from Fanuc. With the 30Kg robot we have created a small footprint, reliable end of line palletizer that's perfect for many applications. The system comes with a simple to use HMI, and Tablet teach pendant with Fanuc 4D graphics.

CRX Collaborative Robot Series

Using the latest 'Collaborative' technology from Fanuc allows us to create an end of line palletizer with a similar footprint to a manual system. Working alongside your co-workers, these robots do the heavy lifting! Fanuc cobots immediately stop after coming into contact with a person or fixed object thanks to proven safe contact stop sensor technology.

- Case, Trays & Bags
- Rate up to 7 picks/min (case dependent)
- Capable of up to 50 lb. loads
