

INTRODUCING ROBOTEND LITE

**Reliable & Affordable
Machine Tending Partner**

- **No Sick Days**
- **No Breaks**
- **Just Productivity**

ROBOTEND Lite by CENTRIC Automation is a compact, cost-effective automated machine tending system designed to boost productivity and solve labor challenges in CNC machining environments. Compatible with both mills and lathes, the ROBOTEND LITE can handle round or multi-sided parts, as well as barstock, using different sized templates and part-holding templates.

POWERED BY:
FANUC

With quick plug-and-play installation and a fast ROI in 12 months or less, ROBOTEND Lite is the smart, accessible solution for manufacturers looking to automate efficiently and affordably.

SAFE COLLABORATIVE OPERATION

Powered by reliable FANUC collaborative robot technology, it enables one operator to manage multiple machines, improves consistency, and ensures safe human-robot interaction.

FAST ROI

Achieve a return on investment in under a year by reducing labor costs and maximizing spindle uptime.

PLUG & PLAY

Easy setup with minimal disruption; get up and running quickly without complex integration. No robot programming experience required.

PORTABLE

Works with mills, lathes and other machines requiring part feeding; templates for different part types
