

AGRICULTURAL SCIENCE IN ELEMENTARY EDUCATION LEARNING IN GARDENS AT SCHOOL (AG SEED-LINGS)

Dates: July 15-21, 2024

Time: 8:30 AM - 4:00 PM

Location: virtual

Target audience: K-5th grade teachers

REGISTER HERE!

AG SEED-LINGS is a science-focused professional development program specifically designed for teachers in grades K-5. This program is a collaboration between Penn State's Center for Science and the Schools (CSATS) and the Center for Pollinator Research (CPR).

Through a series of backyard investigative activities, virtual site visits, and curriculum exploration, teachers will:

- Discover the essential role of pollinators in agriculture
- Learn the strategies used by research scientists
- Be prepared to engage their students in the science practices centered around pollinator research
- Review and adapt grade-level science curriculum plans that integrate science, math, and English language arts

Participant Benefits:

- Select pollinator-related classroom supplies
- Act 48 credit is available upon request
