This workshop will guide educators through a newly piloted student-led online short course that focuses on pollinator preferences and the crucial relationship between pollinators and plant growth—key topics in agricultural science. Perfect for educators passionate about integrating agricultural sciences into their STEM curriculum. This hands-on workshop will provide the tools and insights needed to engage your students in real-world data analysis and critical thinking.

We are actively seeking participants interested in piloting this module in their classroom, Fall 2024.
