

modern *face*™ sculpturing

Our mission is to bring about a natural, youthful appearance without the use of neurotoxins or fillers naturally lifting and firming through manual techniques designed to reshape the facial contours.

A combination of hands only face massage, Intra-oral buccal massage, Gua Sha, and EMS are used to promote lymphatic drainage, minimize the appearance of facial sagging, wrinkles, puffy eyes, crow's feet, and saggy jowls. These techniques also support collagen growth and a healthy complexion creating a youthful, vibrant look to the face and neck.
